## EXPERIENCE

### Full Stack Web Developer

#### **DBOX** - New York, NY | 2018 - Present

DBOX is an international creative communications agency that develops innovative, strategic marketing campaigns in the sectors of luxury residential, hospitality, commercial, and cultural property

- Play a pivotal role in the full web design and engineering lifecycle by providing design input, executing development, and performing the full-breadth of systems operations
- Develop and maintain Node API's that interface with AWS in order to provide critical services to clients
- Utilize AWS for static and server-side web hosting using Route53, S3, EC2, CloudFront and CloudFormation
- Overhauled development workflow by leveraging continuous integration and deployment with AWS CodePipeline and TravisCI
- Introduced a collaborative code review into the hiring process to better identify strengths and weaknesses of candidates.

### Coding Instructor

#### **Code Nation** - New York, NY | 2017 - Present

Code Nation equips students in under-resourced high schools with the skills, experiences, and connections that together create access to careers in tech.

- Teach HTML, CSS and JavaScript to high school students in an underserved NYC-based high school
- Work closely with students to develop fundamental coding skills and empower them to pursue careers in technology
